JOURNAL OF SPACECRAFT AND ROCKETS
Vol. 48, No. 6, November–December 2011

2011 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 1072–1076, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 1077–1078, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1079–1083, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2010, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments are also listed in the Author Index.

Subject Index

AIRCRAFT TECHNOLOGY, CONVENTIONAL, SHORT TAKEOFF AND LANDING/ VERTICAL TAKEOFF AND LANDING

Aerodynamics

A11-086 Aerodynamics for Mars Phoenix Entry Capsule
A11-050 Linearized Aeroelastic Gust Response Analysis of a Launch Vehicle

Cabin Environment, Crew Training, and Life Support

A11-041 Prediction of Reliability for Environmental Control and Life Support Systems

Flight Mechanics

A11-089 Mars Phoenix Entry, Descent, and Landing Simulation Design and Modeling Analysis
A11-092 Entry, Descent, and Landing Operations Analysis for the Mars Phoenix Lander
A11-094 Entry, Descent, and Landing Performance of the Mars Phoenix Lander

Fuels and Fuel Systems

A11-061 Optical Mass Gauging System for Measuring Liquid Levels in a Reduced-Gravity Environment

Landing Dynamics

A11-095 Mars Phoenix Entry, Descent, and Landing Trajectory and Atmosphere Reconstruction

Simulation

A11-005 Effect of Electron and Ultraviolet Radiations and Temperature on n-Si Conductivity

Structural Materials

A11-005 Effect of Electron and Ultraviolet Radiations and Temperature on n-Si Conductivity

COMPUTING, INFORMATION, AND COMMUNICATION

Distributed Systems and Networking

A11-110 Assessing Fractionated Spacecraft Value Propositions for Earth Imaging Space Missions

Embedded Systems

A11-078 Improving the LEON Spacecraft Computer Processor for Real-Time Performance Analysis

ENERGY

Solar Power

A11-040 Flashover Discharge on Solar Arrays: Analysis of Discharge Current and Image
A11-008 Changes of Solar Array Surfaces on Orbital Station Mir

FLIGHT SIMULATOR SYSTEMS

Guidance, Navigation, and Control Systems

A11-098 Handling Qualities Evaluation of Pilot Tools for Spacecraft Docking in Earth Orbit
A11-053 Effects of Control Power and Inceptor Sensitivity on Lunar Lander Handling Qualities

FLUID DYNAMICS

Boundary-Layer Stability and Transition

A11-048 Effect of Freestream Noise on Roughness-Induced Transition for a Slender Cone
A11-065 Boundary-Layer Transition on a Hypersonic Forebody: Experiments and Calculations

Computational Fluid Dynamics

A11-067 Interactions of Single-Nozzle Sonic Propulsive Deceleration Jets on Mars Entry Aeroshells
A11-037 Experimental and Numerical Investigation of Aerothermal Characteristics of Hypersonic Intermediate Experimental Vehicle
A11-012 Numerical Analysis of Spacecraft Rocket Plume Impingement Under Lunar Environment
A11-010 Loose-Coupling Algorithm for Simulating Hypersonic Flows with Radiation and Ablation
A11-087 Aeroheating Predictions for Phoenix Entry Vehicle
A11-036 Electronic Energy Level Transition and Ionization Following the Quantum-Kinetic Chemistry Model
A11-086 Aerodynamics for Mars Phoenix Entry Capsule

Hydrodynamics

A11-077 Trajectory Prediction of Spin-Stabilized Projectiles with a Liquid Payload
A11-071 Dynamic Response to Global Oscillation of Propulsion Systems with Cavitating Pumps
A11-064 Static Characteristics of a Flow Regulator for a Liquid Rocket Engine

Hypersonic Flow

A11-039 Drag Coefficients of Satellites with Concave Geometries: Comparing Models and Observations
A11-065 Boundary-Layer Transition on a Hypersonic Forebody: Experiments and Calculations
A11-067 Interactions of Single-Nozzle Sonic Propulsive Deceleration Jets on Mars Entry Aeroshells
A11-082 Force Measurements in Hypervelocity Flows with an Acceleration Compensated Piezoelectric Balance
A11-037 Experimental and Numerical Investigation of Aerothermal Characteristics of Hypersonic Intermediate Experimental Vehicle
A11-048 Effect of Freestream Noise on Roughness-Induced Transition for a Slender Cone
A11-047 Particle Simulations of Planetary Probe Flows Employing Automated Mesh Refinement
A11-087 Aeroheating Predictions for Phoenix Entry Vehicle
A11-046 Simulating Stardust Earth Reentry with Radiation Heat Transfer
A11-086 Aerodynamics for Mars Phoenix Entry Capsule

Inlet, Nozzle, Diffuser, and Channel Flows

A11-038 Analysis of Transient Flow in Supersonic Micronozzles

A11-087 Aeroheating Predictions for Phoenix Entry Vehicle
A11-046 Simulating Stardust Earth Reentry with Radiation Heat Transfer
A11-086 Aerodynamics for Mars Phoenix Entry Capsule

Inlet, Nozzle, Diffuser, and Channel Flows

A11-038 Analysis of Transient Flow in Supersonic Micronozzles

Jets, Wakes, and Viscid-Inviscid Flow Interactions

A11-067 Interactions of Single-Nozzle Sonic Propulsive Deceleration Jets on Mars Entry Aeroshells
A11-088 Analysis of Effectiveness of Phoenix Entry Reaction Control System

Rarefied Flows

A11-047 Particle Simulations of Planetary Probe Flows Employing Automated Mesh Refinement
A11-039 Drag Coefficients of Satellites with Concave Geometries: Comparing Models and Observations
A11-036 Electronic Energy Level Transition and Ionization Following the Quantum-Kinetic Chemistry Model
A11-012 Numerical Analysis of Spacecraft Rocket Plume Impingement Under Lunar Environment

Supersonic Flow

A11-011 Substitution of Hot-Gas Lateral Jets by Cold-Gas Jets in Supersonic Flows

Transonic Flow

A11-069 Large-Scale Computations for Stability Analysis of Launch Vehicles Using Cluster Computers

Vortices

A11-013 Numerical Analysis on Oscillation Characteristics in a Tailpipe Nozzle Solid Rocket Motor

GUIDANCE, CONTROL, AND DYNAMICS TECHNOLOGY

Astrodynamics

A11-019 Precision Orbit Derived Total Density
A11-056 Rotational Stiffness Study of Two-Element Tethered Coulomb Structures
A11-089 Mars Phoenix Entry, Descent, and Landing Simulation Design and Modeling Analysis

Control System Effectors

A11-088 Analysis of Effectiveness of Phoenix Entry Reaction Control System

Control Theory

A11-051 Direct Trajectory Optimization Using a Variable Low-Order Adaptive Pseudospectral Method
A11-099 Costate Estimation using Multiple-Interval Pseudospectral Methods

Flight Displays

A11-098 Handling Qualities Evaluation of Pilot Tools for Spacecraft Docking in Earth Orbit

Flight Mechanics

A11-094 Entry, Descent, and Landing Performance of the Mars Phoenix Lander
A11-090 Multibody Modeling and Simulation for Mars Phoenix Entry, Descent, and Landing
A11-114 Sequential Design of Satellite Formations with Invariant Distances
A11-075 Optimal Longitudinal Trajectories for Reusable Space Vehicles in the Terminal Area
A11-113 Mars Entry Bank Profile Design for Terminal State Optimization

Handling Qualities

A11-098 Handling Qualities Evaluation of Pilot Tools for Spacecraft Docking in Earth Orbit
A11-053 Effects of Control Power and Inceptor Sensitivity on Lunar Lander Handling Qualities

Launch Vehicle Dynamics

A11-063 Parameter Study on Pogo Stability of Liquid Rockets
A11-068 Modeling Multibody Stage Separation Dynamics Using Constraint Force Equation Methodology

Launch Vehicle Guidance and Control

A11-075 Optimal Longitudinal Trajectories for Reusable Space Vehicles in the Terminal Area

Missile Dynamics

A11-025 Measurement-Based Modeling Methodology for Ballistic Missile Trajectory Simulation
A11-077 Trajectory Prediction of Spin-Stabilized Projectiles with a Liquid Payload

Navigation

A11-093 Landing-Site Dispersion Analysis and Statistical Assessment for the Mars Phoenix Lander
A11-117 Orbit Determination and Prediction of the International Space Station
A11-116 In-Orbit Demonstration of an Optical Navigation System for Autonomous Rendezvous Docking

Optimization Techniques

A11-074 Hidden Genes Genetic Algorithm for Multi-Gravity-Assist Trajectories Optimization
A11-099 Costate Estimation using Multiple-Interval Pseudospectral Methods
A11-066 Optimal Placement of Electronic Components to Minimize Heat Flux Nonuniformities
A11-113 Mars Entry Bank Profile Design for Terminal State Optimization
A11-051 Direct Trajectory Optimization Using a Variable Low-Order Adaptive Pseudospectral Method

Spacecraft Dynamics

A11-085 Overview of the Phoenix Entry, Descent, and Landing System Architecture
A11-092 Entry, Descent, and Landing Operations Analysis for the Mars Phoenix Lander
A11-039 Drag Coefficients of Satellites with Concave Geometries: Comparing Models and Observations
A11-056 Rotational Stiffness Study of Two-Element Tethered Coulomb Structures
A11-090 Multibody Modeling and Simulation for Mars Phoenix Entry, Descent, and Landing
A11-115 Attitude and Power Analysis of Two-Node Multitethered Coulomb Structures
A11-109 Dynamic Modeling and Experimental Validation of a Cable-Loaded Panel
A11-052 Reduced Model for Flexible Solar Sail Dynamics
A11-117 Orbit Determination and Prediction of the International Space Station

Spacecraft Guidance and Control

A11-021 New Star-Pattern Identification Using a Correlation Approach for Spacecraft Attitude Determination
A11-114 Sequential Design of Satellite Formations with Invariant Distances
A11-091 Phoenix Landing Radar Heatshield Anomaly

State Estimation

A11-025 Measurement-Based Modeling Methodology for Ballistic Missile Trajectory Simulation
A11-080 Attitude Independent Magnetometer Calibration Considering Magnetic Torquer Coupling Effect

System Identification

A11-034 Experimental Investigation and Method of Mathematical Modeling of Electrostatic Discharges

Trajectory Optimization

A11-074 Hidden Genes Genetic Algorithm for Multi-Gravity-Assist Trajectories Optimization
A11-099 Costate Estimation using Multiple-Interval Pseudospectral Methods
A11-075 Optimal Longitudinal Trajectories for Reusable Space Vehicles in the Terminal Area
A11-113 Mars Entry Bank Profile Design for Terminal State Optimization
A11-051 Direct Trajectory Optimization Using a Variable Low-Order Adaptive Pseudospectral Method

INTERDISCIPLINARY TOPICS

Aerospace Management

A11-017 Estimating Technology Readiness Level Coefficients
A11-118 Technology Readiness Levels and Space Program Schedule Change

Aerospace Technology Utilization

A11-017 Estimating Technology Readiness Level Coefficients
A11-076 Intersatellite Separation Mechanism for the JC2Sat Formation-Flying Missions

Analytical and Numerical Methods

A11-077 Trajectory Prediction of Spin-Stabilized Projectiles with a Liquid Payload
A11-010 Loose-Coupling Algorithm for Simulating Hypersonic Flows with Radiation and Ablation

Atmospheric and Space Sciences

A11-095 Mars Phoenix Entry, Descent, and Landing Trajectory and Atmosphere Reconstruction
A11-083 Discharging of Roving Objects in the Lunar Polar Regions

Environmental Effects

A11-083 Discharging of Roving Objects in the Lunar Polar Regions
A11-024 Microsatellite Impact Tests to Investigate the Outcome of Satellite Fragmentations
A11-006 Spectrometers Results of Material Exposure and Degradation Experiment Onboard International Space Station
A11-103 Proton Irradiation Effects on ZnO Pigments Modified by ZrO_2 Nanopowders
A11-033 Damage of Ti-6Al-4V Alloy Induced by Hypervelocity Impact
A11-003 Displacement Damage Characterization of Electron Radiation in Triple-Junction GaAs Solar Cells

Multidisciplinary Design Optimization

A11-054 Electric Propulsion System Selection Process for Interplanetary Missions

Reliability, Maintainability, and Logistics Support

A11-041 Prediction of Reliability for Environmental Control and Life Support Systems
A11-079 Matrix Methods for Optimal Manifesting of Multinode Space Exploration Systems

Safety

A11-024 Microsatellite Impact Tests to Investigate the Outcome of Satellite Fragmentations

LAUNCH VEHICLE AND MISSILE (LV/M) TECHNOLOGY

Aerodynamics

A11-050 Linearized Aeroelastic Gust Response Analysis of a Launch Vehicle

Launch Vehicle and Sounding Rocket Systems

A11-068 Modeling Multibody Stage Separation Dynamics Using Constraint Force Equation Methodology

Missile Systems

A11-020 Target Simulator for Serviceability Check of Infrared-Guided Missiles

Mission Studies and Economics

A11-110 Assessing Fractionated Spacecraft Value Propositions for Earth Imaging Space Missions

Propulsion and Propellant Systems

A11-071 Dynamic Response to Global Oscillation of Propulsion Systems with Cavitating Pumps
A11-043 Parametric Study of Dual-Expander Aerospike Nozzle Upper-Stage Rocket Engine
A11-064 Static Characteristics of a Flow Regulator for a Liquid Rocket Engine
A11-072 Concept and Design Details of a Universal Gas–Gas Launch Escape System
A11-063 Parameter Study on Pogo Stability of Liquid Rockets
A11-111 Dynamical Model of Rocket Propellant Loading with Liquid Hydrogen
A11-027 Effect of Time Gap Between Two Pyrotechnic Thrusters

Simulation

A11-111 Dynamical Model of Rocket Propellant Loading with Liquid Hydrogen
A11-068 Modeling Multibody Stage Separation Dynamics Using Constraint Force Equation Methodology
A11-043 Parametric Study of Dual-Expander Aerospike Nozzle Upper-Stage Rocket Engine
A11-011 Substitution of Hot-Gas Lateral Jets by Cold-Gas Jets in Supersonic Flows
A11-020 Target Simulator for Serviceability Check of Infrared-Guided Missiles
A11-069 Large-Scale Computations for Stability Analysis of Launch Vehicles Using Cluster Computers

Structural Design (Including Loads)

A11-023 Axial-Weld Land Buckling in Compression-Loaded Orthogrid Cylinders

Subsystem Design and Ground Support

A11-072 Concept and Design Details of a Universal Gas–Gas Launch Escape System

Testing, Flight and Ground

A11-011 Substitution of Hot-Gas Lateral Jets by Cold-Gas Jets in Supersonic Flows
A11-020 Target Simulator for Serviceability Check of Infrared-Guided Missiles
A11-037 Experimental and Numerical Investigation of Aerothermal Characteristics of Hypersonic Intermediate Experimental Vehicle

Thermal Protection Systems

A11-105 Silicone Polymer Composites for Thermal Protection of Naval Launching System

Trajectories and Tracking Systems

A11-072 Concept and Design Details of a Universal Gas–Gas Launch Escape System

Vibration

A11-050 Linearized Aeroelastic Gust Response Analysis of a Launch Vehicle
A11-063 Parameter Study on Pogo Stability of Liquid Rockets

PROPULSION

Advanced Space Propulsion

A11-015 Electromagnetic Formation Flight Testbed Using Superconducting Coils
A11-059 Cesium Droplet Evaporation as Contamination Route by Cesium Field Effect Electric Propulsion
A11-101 Deployment Experiment for Ultralarge Solar Sail System (UltraSail)
A11-014 Ionic Liquid Dual-Mode Spacecraft Propulsion Assessment
A11-042 Lunar Orbiter Trade Study and Conceptual Design of Onboard Propulsion System
A11-026 Similarity Criteria and Associated Design Procedures for Scaling Solar Sail Systems

Combustion and Combustor Designs

A11-057 Influence of Scaling Rules on the Loss of Acoustic Energy

Combustion Instability

A11-057 Influence of Scaling Rules on the Loss of Acoustic Energy

Electric Propulsion

A11-014 Ionic Liquid Dual-Mode Spacecraft Propulsion Assessment

Engine Power Cycles

A11-043 Parametric Study of Dual-Expander Aerospike Nozzle Upper-Stage Rocket Engine

Ignition

A11-027 Effect of Time Gap Between Two Pyrotechnic Thrusters

Liquid Rocket Engines

A11-064 Static Characteristics of a Flow Regulator for a Liquid Rocket Engine
A11-071 Dynamic Response to Global Oscillation of Propulsion Systems with Cavitating Pumps
A11-014 Ionic Liquid Dual-Mode Spacecraft Propulsion Assessment
A11-042 Lunar Orbiter Trade Study and Conceptual Design of Onboard Propulsion System
A11-057 Influence of Scaling Rules on the Loss of Acoustic Energy

Micro Propulsion and Power

A11-038 Analysis of Transient Flow in Supersonic Micronozzles

Propulsion Hazards

A11-027 Effect of Time Gap Between Two Pyrotechnic Thrusters

Solid Rocket Motors

A11-013 Numerical Analysis on Oscillation Characteristics in a Tailpipe Nozzle Solid Rocket Motor

REAL-TIME SYSTEMS

Sensor Systems

A11-061 Optical Mass Gauging System for Measuring Liquid Levels in a Reduced-Gravity Environment

Signal Processing

A11-070 Application of System-Identification Techniquest to Health Monitoring of On-Orbit Satellite Boom Structures

Systems Engineering

A11-078 Improving the LEON Spacecraft Computer Processor for Real-Time Performance Analysis
A11-017 Estimating Technology Readiness Level Coefficients

SPACE TECHNOLOGY

Aerobraking Configurations/ Aerothermodynamics

A11-104 Nonequilibrium Chemistry and Radiation for Neptune Entry
A11-088 Analysis of Effectiveness of Phoenix Entry Reaction Control System

Global Positioning System

A11-117 Orbit Determination and Prediction of the International Space Station

Humans in Space/Life Support Systems, Extravehicular Activity

A11-041 Prediction of Reliability for Environmental Control and Life Support Systems

International Space Station

A11-031 Materials International Space Station Experiment 5 Polymer Film Thermal Control Experiment

A11-006 Spectrometers Results of Material Exposure and Degradation Experiment Onboard International Space Station

Landers

A11-089 Mars Phoenix Entry, Descent, and Landing Simulation Design and Modeling Analysis
A11-092 Entry, Descent, and Landing Operations Analysis for the Mars Phoenix Lander
A11-053 Effects of Control Power and Inceptor Sensitivity on Lunar Lander Handling Qualities
A11-094 Entry, Descent, and Landing Performance of the Mars Phoenix Lander

A11-085 Overview of the Phoenix Entry, Descent, and Landing System Architecture
A11-096 Reconstruction of Entry, Descent, and Landing Communications for the Phoenix Mars Lander
A11-093 Landing-Site Dispersion Analysis and Statistical Assessment for the Mars Phoenix Lander
A11-012 Numerical Analysis of Spacecraft Rocket Plume Impingement Under Lunar Environment

Mission Design and Analysis

A11-090 Multibody Modeling and Simulation for Mars Phoenix Entry, Descent, and Landing
A11-054 Electric Propulsion System Selection Process for Interplanetary Missions
A11-093 Landing-Site Dispersion Analysis and Statistical Assessment for the Mars Phoenix Lander
A11-044 Using Satellite Constellations for Improved Determination of Earth's Time-Variable Gravity
A11-114 Sequential Design of Satellite Formations with Invariant Distances
A11-035 Fully-Propulsive Mars Atmospheric Transit Strategies for High-Mass Missions
A11-018 Asteroid Resource Map for Near-Earth Space

Mission Trajectories (Earth and Interplanetary)

A11-018 Asteroid Resource Map for Near-Earth Space
A11-054 Electric Propulsion System Selection Process for Interplanetary Missions
A11-019 Precision Orbit Derived Total Density

Space Experiments

A11-006 Spectrometers Results of Material Exposure and Degradation Experiment Onboard International Space Station
A11-015 Electromagnetic Formation Flight Testbed Using Superconducting Coils
A11-100 Analysis Results of Microparticles Capturer Experiment Samples on Service Module
A11-116 In-Orbit Demonstration of an Optical Navigation System for Autonomous Rendezvous Docking
A11-004 In-Flight Aging of Thermal Coatings: THERME Experiment
A11-002 Prediction of Atomic Oxygen Erosion Yield for Spacecraft Polymers
A11-031 Materials International Space Station Experiment 5 Polymer Film Thermal Control Experiment

Space Processing

A11-078 Improving the LEON Spacecraft Computer Processor for Real-Time Performance Analysis

Space Systems

A11-055 Rigidizable Inflatable Get-Away-Special Experiment Space Flight Data Analysis
A11-118 Technology Readiness Levels and Space Program Schedule Change
A11-101 Deployment Experiment for Ultralarge Solar Sail System (UltraSail)
A11-085 Overview of the Phoenix Entry, Descent, and Landing System Architecture
A11-110 Assessing Fractionated Spacecraft Value Propositions for Earth Imaging Space Missions
A11-029 Charging Behavior of Polyimide/Adhesive Components During Eclipse Events in Geostationary Environment
A11-015 Electromagnetic Formation Flight Testbed Using Superconducting Coils

Spacecraft Attitude Determination

A11-021 New Star-Pattern Identification Using a Correlation Approach for Spacecraft Attitude Determination

Spacecraft Communication

A11-096 Reconstruction of Entry, Descent, and Landing Communications for the Phoenix Mars Lander

Spacecraft Contamination/Sterilization

A11-059 Cesium Droplet Evaporation as Contamination Route by Cesium Field Effect Electric Propulsion
A11-032 Progress on the Physical Approach to Molecular Contamination Modeling
A11-030 Uniquely Customized Ultra-Low-Outgassing Silicones to Reduce Contamination

Spacecraft Data Sensing, Processing, and Transmission

A11-034 Experimental Investigation and Method of Mathematical Modeling of Electrostatic Discharges

Spacecraft Power

A11-040 Flashover Discharge on Solar Arrays: Analysis of Discharge Current and Image
A11-107 Low-Energy Electron Exposure of Space Materials
A11-008 Changes of Solar Array Surfaces on Orbital Station Mir
A11-030 Uniquely Customized Ultra-Low-Outgassing Silicones to Reduce Contamination
A11-003 Displacement Damage Characterization of Electron Radiation in Triple-Junction GaAs Solar Cells

Spacecraft Propulsion System Integration

A11-042 Lunar Orbiter Trade Study and Conceptual Design of Onboard Propulsion System
A11-013 Numerical Analysis on Oscillation Characteristics in a Tailpipe Nozzle Solid Rocket Motor

Spacecraft Radiation Protection

A11-007 Erosion of Carbon-Based Materials Under High-Fluence Heavy-Ion Irradiation
A11-029 Charging Behavior of Polyimide/Adhesive Components During Eclipse Events in Geostationary Environment

Spacecraft Sensor Systems

A11-021 New Star-Pattern Identification Using a Correlation Approach for Spacecraft Attitude Determination
A11-034 Experimental Investigation and Method of Mathematical Modeling of Electrostatic Discharges
A11-091 Phoenix Landing Radar Heatshield Anomaly
A11-044 Using Satellite Constellations for Improved Determination of Earth's Time-Variable Gravity
A11-106 Method to Have Multilayer Thermal Insulation Provide Damage Detection
A11-080 Attitude Independent Magnetometer Calibration Considering Magnetic Torquer Coupling Effect
A11-116 In-Orbit Demonstration of an Optical Navigation System for Autonomous Rendezvous Docking
A11-112 Test and Evaluation of Space and Airborne Imaging Sensor Platforms
A11-030 Uniquely Customized Ultra-Low-Outgassing Silicones to Reduce Contamination

Spacecraft Structural Configuration, Design, and Analysis

A11-076 Intersatellite Separation Mechanism for the JC2Sat Formation-Flying Missions
A11-108 Experimental Techniques and Structural Parameter Estimation Studies of Spacecraft Cables
A11-055 Rigidizable Inflatable Get-Away-Special Experiment Space Flight Data Analysis
A11-109 Dynamic Modeling and Experimental Validation of a Cable-Loaded Panel
A11-016 Overview of the Innovative Space-Based Radar Antenna Technology Program
A11-026 Similarity Criteria and Associated Design Procedures for Scaling Solar Sail Systems

Spacecraft Test and Evaluation

A11-032 Progress on the Physical Approach to Molecular Contamination Modeling
A11-060 Shortening Thermal Balance Tests by Heater Power Regulation
A11-107 Low-Energy Electron Exposure of Space Materials
A11-003 Displacement Damage Characterization of Electron Radiation in Triple-Junction GaAs Solar Cells
A11-076 Intersatellite Separation Mechanism for the JC2Sat Formation-Flying Missions
A11-070 Application of System-Identification Techniquest to Health Monitoring of On-Orbit Satellite Boom Structures
A11-112 Test and Evaluation of Space and Airborne Imaging Sensor Platforms
A11-002 Prediction of Atomic Oxygen Erosion Yield for Spacecraft Polymers
A11-029 Charging Behavior of Polyimide/Adhesive Components During Eclipse Events in Geostationary Environment

Spacecraft Thermal Management

A11-081 Optimal Distribution of Electronic Components to Balance Environmental Fluxes
A11-107 Low-Energy Electron Exposure of Space Materials
A11-066 Optimal Placement of Electronic Components to Minimize Heat Flux Nonuniformities
A11-106 Method to Have Multilayer Thermal Insulation Provide Damage Detection
A11-032 Progress on the Physical Approach to Molecular Contamination Modeling

STRUCTURAL MECHANICS AND MATERIALS

Dynamic Model Analysis

A11-102 Transient Dynamic Analysis of Gossamer-Appendage Deployment Using Nonlinear Finite Element Method
A11-052 Reduced Model for Flexible Solar Sail Dynamics

Flexible and Active Structures

A11-022 Quasi-Static Folding and Deployment of Ultrathin Composite Tape-Spring Hinges
A11-102 Transient Dynamic Analysis of Gossamer-Appendage Deployment Using Nonlinear Finite Element Method

Materials Structural Properties

A11-007 Erosion of Carbon-Based Materials Under High-Fluence Heavy-Ion Irradiation
A11-033 Damage of Ti-6Al–4V Alloy Induced by Hypervelocity Impact

Structural Composite Materials

A11-022 Quasi-Static Folding and Deployment of Ultrathin Composite Tape-Spring Hinges
A11-007 Erosion of Carbon-Based Materials Under High-Fluence Heavy-Ion Irradiation
A11-055 Rigidizable Inflatable Get-Away-Special Experiment Space Flight Data Analysis

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

A11-058 Vacuum Ultraviolet/Atomic Oxygen Erosion Resistance of Amorphous $Si_{0.26}C_{0.43}N_{0.31}$ Coating
A11-070 Application of System-Identification Techniquest to Health Monitoring of On-Orbit Satellite Boom Structures
A11-103 Proton Irradiation Effects on ZnO Pigments Modified by ZrO_2 Nanopowders
A11-002 Prediction of Atomic Oxygen Erosion Yield for Spacecraft Polymers
A11-033 Damage of Ti-6Al-4V Alloy Induced by Hypervelocity Impact

Structural Dynamics and Characterization

A11-109 Dynamic Modeling and Experimental Validation of a Cable-Loaded Panel
A11-108 Experimental Techniques and Structural Parameter Estimation Studies of Spacecraft Cables

Structural Finite Elements

A11-102 Transient Dynamic Analysis of Gossamer-Appendage Deployment Using Nonlinear Finite Element Method
A11-022 Quasi-Static Folding and Deployment of Ultrathin Composite Tape-Spring Hinges
A11-052 Reduced Model for Flexible Solar Sail Dynamics

Structural Stability

A11-023 Axial-Weld Land Buckling in Compression-Loaded Orthogrid Cylinders
A11-069 Large-Scale Computations for Stability Analysis of Launch Vehicles Using Cluster Computers

THERMOPHYSICS AND HEAT TRANSFER

Ablation, Pyrolysis, Thermal Decomposition and Degradation

A11-105 Silicone Polymer Composites for Thermal Protection of Naval Launching System
A11-009 Near-Ultraviolet Emission Spectroscopy During an Airborne Observation of the Stardust Reentry
A11-058 Vacuum Ultraviolet/Atomic Oxygen Erosion Resistance of Amorphous $Si_{0.26}C_{0.43}N_{0.31}$ Coating

Aerothermodynamics/Thermal Protection

A11-087 Aeroheating Predictions for Phoenix Entry Vehicle
A11-010 Loose-Coupling Algorithm for Simulating Hypersonic Flows with Radiation and Ablation
A11-047 Particle Simulations of Planetary Probe Flows Employing Automated Mesh Refinement
A11-097 Direct Coupling of the NEQAIR Radiation and DPLR CFD Codes
A11-105 Silicone Polymer Composites for Thermal Protection of Naval Launching System
A11-009 Near-Ultraviolet Emission Spectroscopy During an Airborne Observation of the Stardust Reentry

Computational Heat Transfer

A11-097 Direct Coupling of the NEQAIR Radiation and DPLR CFD Codes
A11-049 Base Flow Studies for a Single-Engine Launch Vehicle Configuration

Cryogenics

A11-112 Test and Evaluation of Space and Airborne Imaging Sensor Platforms
A11-111 Dynamical Model of Rocket Propellant Loading with Liquid Hydrogen

Heat Conduction

A11-062 Numerical Validation of an Effective Radiation Heat Transfer Model for Fiber Preforms

Nonintrusive Diagnostics

A11-009 Near-Ultraviolet Emission Spectroscopy During an Airborne Observation of the Stardust Reentry

Radiation in Participating Media

A11-046 Simulating Stardust Earth Reentry with Radiation Heat Transfer
A11-097 Direct Coupling of the NEQAIR Radiation and DPLR CFD Codes

Radiation Interchange Between Surfaces

A11-062 Numerical Validation of an Effective Radiation Heat Transfer Model for Fiber Preforms
A11-005 Effect of Electron and Ultraviolet Radiations and Temperature on n-Si Conductivity

Thermal Control

A11-081 Optimal Distribution of Electronic Components to Balance Environmental Fluxes
A11-004 In-Flight Aging of Thermal Coatings: THERME Experiment
A11-106 Method to Have Multilayer Thermal Insulation Provide Damage Detection
A11-060 Shortening Thermal Balance Tests by Heater Power Regulation

Thermal Modeling and Analysis

A11-081 Optimal Distribution of Electronic Components to Balance Environmental Fluxes
A11-066 Optimal Placement of Electronic Components to Minimize Heat Flux Nonuniformities
A11-062 Numerical Validation of an Effective Radiation Heat Transfer Model for Fiber Preforms
A11-060 Shortening Thermal Balance Tests by Heater Power Regulation

Thermochemistry and Chemical Kinetics

A11-036 Electronic Energy Level Transition and Ionization Following the Quantum-Kinetic Chemistry Model
A11-104 Nonequilibrium Chemistry and Radiation for Neptune Entry

Chronological Index

A11-001 Introduction: Space Environmental Effects on Materials III. Richard Briet, *Centre National d'Etudes Spatialies*, France (**48**, 1, p. 13) Article

A11-002 Prediction of Atomic Oxygen Erosion Yield for Spacecraft Polymers. Bruce A. Banks, *Alphaport, Inc.*; Jane A. Backus, *Ohio Aerospace Institute*; Michael V. Manno, *Alphaport, Inc.*; Deborah L. Waters, *ASRC Aerospace*; Kevin C. Cameron, *Ohio Aerospace Institute*; and Kim K. de Groh, *NASA John H. Glenn Research Center at Lewis Field* (**48**, 1, p. 14) Article

A11-003 Displacement Damage Characterization of Electron Radiation in Triple-Junction GaAs Solar Cells. Sheng-Sheng Yang, Xin Gao, Yun-Fei Wang, and Zhan-Zu Feng, *Chinese Academy of Space Technology*, China (PRC) (**48**, 1, p. 23) Article

A11-004 In-Flight Aging of Thermal Coatings: THERME Experiment. Stéphanie Remaury, Pascale Nabarra, Elise Bellouard, and Stéphane d'Escrivan, *Centre National d'Etudes Spatiales*, France (**48**, 1, p. 27) Article

A11-005 Effect of Electron and Ultraviolet Radiations and Temperature on n-Si Conductivity. H. N. Yeritsyan, A. A. Sahakyan, S. K. Nikoghosyan, V. V. Harutunyan, S. Ohanyan, and V. S. Avagyan, *Yerevan Physics Institute*, Armenia; V. A. Sahakyan, *Institute of Metrology*, Armenia; and K. A. Movsisyan, *Yerevan Physics Institute*, Armenia (**48**, 1, p. 34) Article

A11-006 Spectrometers Results of Material Exposure and Degradation Experiment Onboard International Space Station. V. Rejsek-Riba, V. Inguimbert, S. Duzellier, C. Pons, and M. Crepel, *ONERA*, France; and A. P. Tighe, *ESA*, The Netherlands (**48**, 1, p. 38) Article

A11-007 Erosion of Carbon-Based Materials Under High-Fluence Heavy-Ion Irradiation. N. N. Andrianova, A. M. Borisov, and E. S. Mashkova, *Moscow State University*, Russia; and Yu. S. Virgiliev, *NIIgraphite*, Russia (**48**, 1, p. 45) Article

A11-008 Changes of Solar Array Surfaces on Orbital Station Mir. Vladimir E. Skurat, Ilya O. Leipunsky, Ilya O. Volkov, Pavel A. Pshechenkov, and Nadezhda G. Beriozkina, *Russian Academy of Sciences*, Russia; and Lenina S. Gatsenko, *Research and Development Enterprise*, Russia (**48**, 1, p. 53) Article

A11-009 Near-Ultraviolet Emission Spectroscopy During an Airborne Observation of the Stardust Reentry. Michael W. Winter and Kerry A. Trumble, *NASA Ames Research Center* (**48**, 1, p. 59) Article based on AIAA Paper 2008-1212

A11-010 Loose-Coupling Algorithm for Simulating Hypersonic Flows with Radiation and Ablation. Paul T. Bauman, Roy Stogner, Graham F. Carey, Karl W. Schulz, Rochan Updadhyay, and Andre Maurente, *University of Texas at Austin* (**48**, 1, p. 72) Article based on AIAA Paper 2010-1462

A11-011 Substitution of Hot-Gas Lateral Jets by Cold-Gas Jets in Supersonic Flows. F. Sourgen, T. Gauthier, F. Leopold, and B. Sauerwein, *French–German Research Institute of Saint-Louis*, France; and R. Meuer, *Rheinmetall Waffe Munition, GmbH*, Germany (**48**, 1, p. 81) Article

A11-012 Numerical Analysis of Spacecraft Rocket Plume Impingement Under Lunar Environment. Abhijit Tosh, Peter A. Liever, Robert R. Arslanbekov, and Sami D. Habchi, *CFD Research Corporation* (**48**, 1, p. 93) Article

A11-013 Numerical Analysis on Oscillation Characteristics in a Tailpipe Nozzle Solid Rocket Motor. Qiao Zhang, Jun-wei Li, Wei-chen Wang, and Ning-fei Wang, *Beijing Institute of Technology*, China (PRC) (**48**, 1, p. 103) Article based on AIAA Paper 2010-7161

A11-014 Ionic Liquid Dual-Mode Spacecraft Propulsion Assessment. Brian R. Donius and Joshua L. Rovey, *Missouri University of Science and Technology* (**48**, 1, p. 110) Article

A11-015 Electromagnetic Formation Flight Testbed Using Superconducting Coils. Daniel W. Kwon and Raymond J. Sedwick, *University of Maryland*; Sang-il Lee and Jaime Ramirez-Riberos, *Massachusetts Institute of Technology* (**48**, 1, p. 124) Article

A11-016 Overview of the Innovative Space-Based Radar Antenna Technology Program. Steven A. Lane and Thomas W. Murphey, *U.S. Air Force Research Laboratory*; and Michael Zatman, *QinetiQ North America* (**48**, 1, p. 135) Article

A11-017 Estimating Technology Readiness Level Coefficients. Edmund H. Conrow, *Management and Technology Associates* (**48**, 1, p. 146) Article

A11-018 Asteroid Resource Map for Near-Earth Space. J. P. Sanchez and C. McInnes, *University of Strathclyde*, Great Britain (**48**, 1, p. 153) Article

A11-019 Precision Orbit Derived Total Density. Craig A. McLaughlin, Andrew Hiatt, and Travis Lechtenberg, *University of Kansas* (**48**, 1, p. 166) Article based on AIAA Paper 2008-6951

A11-020 Target Simulator for Serviceability Check of Infrared-Guided Missiles. Anil K. Maini, *Laser Science and Technology Centre*, India; Anandi L. Verma, *Amity University*, India; and Varsha Agrawal, *Laser Science and Technology Centre*, India (**48**, 1, p. 175) Article

A11-021 New Star-Pattern Identification Using a Correlation Approach for Spacecraft Attitude Determination. Hyosang Yoon, *Satrec Initiative*, South Korea (ROK); Yeerang Lim and Hyochoong Bang, *Korea Advanced Institute of Science and Technology*, South Korea (ROK) (**48**, 1, p. 182) Article

A11-022 Quasi-Static Folding and Deployment of Ultrathin Composite Tape-Spring Hinges. H. M. Y. C. Mallikarachchi, *University of Cambridge*, Great Britain; and S. Pellegrino, *California Institute of Technology* (**48**, 1, p. 187) Article

A11-023 Axial-Weld Land Buckling in Compression-Loaded Orthogrid Cylinders. Robert P. Thornburgh, *U.S. Army Research Laboratory* (**48**, 1, p. 199) Article

A11-024 Microsatellite Impact Tests to Investigate the Outcome of Satellite Fragmentations. Junko Murakami and Toshiya Hanada, *Kyusyu University*, Japan; and J.-C. Liou, *NASA Johnson Space Center* (**48**, 1, p. 208) Article

A11-025 Measurement-Based Modeling Methodology for Ballistic Missile Trajectory Simulation. Ashok Joshi and C. J. Robin Jiss, *Indian Institute of Technology*, India (**48**, 1, p. 213) Technical Note

A11-026 Similarity Criteria and Associated Design Procedures for Scaling Solar Sail Systems. Stephen L. Canfield and John Peddieson, *Tennessee Technological University*; and Gregory Garbe, *NASA Marshall Space Flight Center* (**48**, 1, p. 218) Technical Note

A11-027 Effect of Time Gap Between Two Pyrotechnic Thrusters. Kiun Kim, In-Soo Jeon, and Sung-Woo Ahn, *Agency for Defense Development*, South Korea (ROK) (**48**, 1, p. 221) Technical Note

A11-028 Introduction: Space Environmental Effects on Materials III. Richard Briet, *Centre National d'Etudes Spatiales-Toulouse*, France (**48**, 2, p. 225) Article

A11-029 Charging Behavior of Polyimide/Adhesive Components During Eclipse Events in Geostationary Environment. T. Paulmier and Bernard Dirassen, *ONERA*, France; and D. Payan, *Centre National d'Etudes Spatiales*, France (**48**, 2, p. 226) Article

A11-030 Uniquely Customized Ultra-Low-Outgassing Silicones to Reduce Contamination. Vincent Malave, Brian Burkitt, Bill Riegler, Roy Johnson, and Rob Thomaier, *NuSil Technology* (**48**, 2, p. 235) Article

A11-031 Materials International Space Station Experiment 5 Polymer Film Thermal Control Experiment. Sharon K. R.. Miller and Joyce A. Dever, *NASA John H. Glenn Research Center at Lewis Field* (**48**, 2, p. 240) Article

A11-032 Progress on the Physical Approach to Molecular Contamination Modeling. J.-F. Roussel, T. Tondu, and T. Paulmier, *ONERA*, France; D. Faye, *Centre National d'Etudes Spatiales*, France; M. van Eesbeek and R. Rampini, *ESA*, The Netherlands (**48**, 2, p. 246) Article

A11-033 Damage of Ti-6Al-4V Alloy Induced by Hypervelocity Impact. S.L. Dong, Z. Y. Ye, H. B. Geng, H. Zhang, Y. Zou, D. Z. Yang, and S. Y. He, *Harbin Institute of Technology*, China (PRC); and E. H. Han, *Chinese Academy of Sciences*, China (PRC) (**48**, 2, p. 256) Article

A11-034 Experimental Investigation and Method of Mathematical Modeling of Electrostatic Discharges. V. A. Ivanov, *Korolyov*, Russia; and E. P. Morozov, *Fryazino*, Russia (**48**, 2, p. 266) Article

A11-035 Fully-Propulsive Mars Atmospheric Transit Strategies for High-Mass Missions. Christopher L. Marsh and Robert D. Braun, *Georgia Institute of Technology* (**48**, 2, p. 271) Article

A11-036 Electronic Energy Level Transition and Ionization Following the Quantum-Kinetic Chemistry Model. Derek S. Liechty, *NASA Langley Research Center*; and Mark Lewis, *University of Maryland* (**48**, 2, p. 283) Article based on AIAA Paper 2010-449

A11-037 Experimental and Numerical Investigation of Aerothermal Characteristics of Hypersonic Intermediate Experimental Vehicle. Pietro Roncioni, Giuliano Ranuzzi, and Marco Marini, *Italian Aerospace Research Center*, Italy; Sebastien Paris, *von Kármán Institute for Fluid Dynamics*, Belgium; Emmanuel Cosson, *Astrium Space Transportation*, France; and Thomas Walloschek, *ESA/European Space Research and Technology Centre*, The Netherlands (**48**, 2, p. 291) Article

A11-038 Analysis of Transient Flow in Supersonic Micronozzles. William F. Louisos and Darren L. Hitt, *University of Vermont* (**48**, 2, p. 303) Article based on AIAA Paper 2006-2874

A11-039 Drag Coefficients of Satellites with Concave Geometries: Comparing Models and Observations. Marcin D. Pilinski, Brian M. Argrow, and Scott E. Palo, *University of Colorado* (**48**, 2, p. 312) Article

A11-040 Flashover Discharge on Solar Arrays: Analysis of Discharge Current and Image. Teppei Okumura, Mitsuru Imaizumi, Kumi Nitta, and Masato Takahashi, *Japan Aerospace Exploration Agency*, Japan; Tomonori Suzuki and Kazuhiro Toyoda, *Kyushu Institute of Technology*, Japan (**48**, 2, p. 326) Article

A11-041 Prediction of Reliability for Environmental Control and Life Support Systems. Haibei Jiang and Luis F. Rodriguez, *University of Illinois at Urbana–Champaign*; Scott Bell and David Kortenkamp, *NASA Johnson Space Center*; and Francisco Capristan, *Georgia Institute of Technology* (**48**, 2, p. 336) Article based on AIAA Paper 2008-7818

A11-042 Lunar Orbiter Trade Study and Conceptual Design of Onboard Propulsion System. Kyun Ho Lee, *Korea Aerospace Research Institute*, South Korea (ROK) (**48**, 2, p. 346) Article

A11-043 Parametric Study of Dual-Expander Aerospike Nozzle Upper-Stage Rocket Engine. J. Simmons and Richard Branam, *Air Force Institute of Technology* (**48**, 2, p. 355) Article

A11-044 Using Satellite Constellations for Improved Determination of Earth's Time-Variable Gravity. Brian C. Gunter, Joao Encarnacao, Pavel Ditmar, and Roland Klees, *Delft University of Technology*, The Netherlands (**48**, 2, p. 368) Article based on AIAA Paper 2009-191

A11-045 Direct Curing of Polymer Construction Material in Simulated Earth's Moon Surface Environment. Alexey Kondyurin, *University of Sydney*, Australia (**48**, 2, p. 378) Article

A11-046 Simulating Stardust Earth Reentry with Radiation Heat Transfer. J S. Shang, *Wright State University*; and S T. Surzhikov, *Russian Academy of Sciences*, Russia (**48**, 3, p. 385) Article based on AIAA Paper 2010-4455

A11-047 Particle Simulations of Planetary Probe Flows Employing Automated Mesh Refinement. Da Gao, Chonglin Zhang, and Thomas E. Schwartzentruber, *University of Minnesota* (**48**, 3, p. 397) Article based on AIAA Paper 2010-450

A11-048 Effect of Freestream Noise on Roughness-Induced Transition for a Slender Cone. Katya M. Casper, *Purdue University*; Heath B. Johnson, *University of Minnesota*; and Steven P. Schneider, *Purdue University* (**48**, 3, p. 406) Article based on AIAA Paper 2008-4291

A11-049 Base Flow Studies for a Single-Engine Launch Vehicle Configuration. Tina Thomas and C. Unnikrishnan, *Vikram Sarabhai Space Centre*, India (**48**, 3, p. 414) Article

A11-050 Linearized Aeroelastic Gust Response Analysis of a Launch Vehicle. Franco Mastroddi, Fulvio Stella, Davide Cantiani, and Fabio Vetrano, *University of Rome "La Sapienza"*, Italy (**48**, 3, p. 420) Article

A11-051 Direct Trajectory Optimization Using a Variable Low-Order Adaptive Pseudospectral Method. Christopher L. Darby, William W. Hager, and Anil V. Rao, *University of Florida* (**48**, 3, p. 433) Article based on AIAA Paper 2010-8272

A11-052 Reduced Model for Flexible Solar Sail Dynamics. Qing Li, *Tsinghua University*, China (PRC); Xingrui Ma, *China Aerospace Science and Technology Corporation*, China (PRC); and Tianshu Wang, *Tsinghua University*, China (PRC) (**48**, 3, p. 446) Article

A11-053 Effects of Control Power and Inceptor Sensitivity on Lunar Lander Handling Qualities. Eric Mueller, Karl D. Bilimoria, and Chad Frost, *NASA Ames Research Center* (**48**, 3, p. 454) Article based on AIAA Paper 2009-6407

A11-054 Electric Propulsion System Selection Process for Interplanetary Missions. Damon Landau, James Chase, Thomas Randolph, Paul Timmerman, and David Oh, *Jet Propulsion Laboratory, California Institute of Technology* (**48**, 3, p. 467) Article based on AIAA Paper 2008-7362

A11-055 Rigidizable Inflatable Get-Away-Special Experiment Space Flight Data Analysis. Jonathan T. Black, Richard G. Cobb, Eric D. Swenson, and Brett J. Cooper, *Air Force Institute of Technology* (**48**, 3, p. 477) Article based on AIAA Paper 2009-2157

A11-056 Rotational Stiffness Study of Two-Element Tethered Coulomb Structures. Carl R. Seubert and Hanspeter Schaub, *University of Colorado at Boulder* (**48**, 3, p. 488) Article

A11-057 Influence of Scaling Rules on the Loss of Acoustic Energy. Daniel Morgenweck and Thomas Sattelmayer, *Technical University of Munich*, Germany; Felix Fassl and Roland Kaess, *Astrium, GmbH*, Germany (**48**, 3, p. 498) Article

A11-058 Vacuum Ultraviolet/Atomic Oxygen Erosion Resistance of Amorphous $Si_{0.26}C_{0.43}N_{0.31}$ Coating. L. F. Hu, M. S. Li, J. J. Xu, Ziqi Sun, and Y. C. Zhou, *Chinese Academy of Sciences*, China (PRC) (**48**, 3, p. 507) Article

A11-059 Cesium Droplet Evaporation as Contamination Route by Cesium Field Effect Electric Propulsion. T. Tondu, J.-C. Mateo-Vellez, and J.-F. Roussel, *ONERA*, France; and E. Chesta, *Centre National d'Etudes Spatiales*, France (**48**, 3, p. 513) Article

A11-060 Shortening Thermal Balance Tests by Heater Power Regulation. Jochen Doenecke, *Germany*; and Gerhard Hartmann, *EADS Astrium Space Transportation*, Germany (**48**, 3, p. 520) Article

A11-061 Optical Mass Gauging System for Measuring Liquid Levels in a Reduced-Gravity Environment. Ryan M. Sullenberger, Wesley M. Munoz, Matt P. Lyon, Kenny Vogel, and Azer P. Yalin, *Colorado State University*; Valentin Korman, *K Sciences GP, LLC*; and Kurt A. Polzin, *NASA Marshall Space Flight Center* (**48**, 3, p. 528) Article based on AIAA Paper 2010-7132

A11-062 Numerical Validation of an Effective Radiation Heat Transfer Model for Fiber Preforms. A. J. van Eekelen, *SAMTECH*, Belgium; and J. Lachaud, *University of California, Santa Cruz* (**48**, 3, p. 534) Technical Note based on AIAA Paper 2010-4904

A11-063 Parameter Study on Pogo Stability of Liquid Rockets. Zhihua Zhao and Gexue Ren, *Tsinghua University*, China (PRC); Ziwen Yu, Bo Tang, and Qingsong Zhang, *China Academy of Launch Vehicle Technology*, China (PRC) (**48**, 3, p. 537) Technical Note

A11-064 Static Characteristics of a Flow Regulator for a Liquid Rocket Engine. Taekyu Jung, *Korea Aerospace Research Institute*, South Korea (ROK) (**48**, 3, p. 541) Technical Note

A11-065 Boundary-Layer Transition on a Hypersonic Forebody: Experiments and Calculations. Evgeniy Orlik, Ivan Fedioun, and Dmitry Davidenko, *Centre National de la Recherche Scientifique*, France (**48**, 4, p. 545) Article based on AIAA Paper 2009-7352

A11-066 Optimal Placement of Electronic Components to Minimize Heat Flux Nonuniformities. Derek W. Hengeveld, *LoadPath*; James E. Braun and Eckhard A. Groll, *Purdue University*; and Andrew D. Williams, *U.S. Air Force Research Laboratory* (**48**, 4, p. 556) Article based on AIAA Paper 2009-2223

A11-067 Interactions of Single-Nozzle Sonic Propulsive Deceleration Jets on Mars Entry Aeroshells. Hicham Alkandry and Iain D. Boyd, *University of Michigan*; Erin M. Reed, Joshua R. Codoni, and James C. McDaniel, *University of Virginia* (**48**, 4, p. 564) Article based on AIAA Paper 2010-4888

A11-068 Modeling Multibody Stage Separation Dynamics Using Constraint Force Equation Methodology. Paul V. Tartabini and Carlos M. Roithmayr, *NASA Langley Research Center*; Matthew D. Toniolo and Christopher D. Karlgaard, *Analytical Mechanics Associates, Inc.*; and Bandu N. Pamadi, *NASA Langley Research Center* (**48**, 4, p. 573) Article based on AIAA Paper 2008-7039

A11-069 Large-Scale Computations for Stability Analysis of Launch Vehicles Using Cluster Computers. Guru P. Guruswamy, *NASA Ames Research Center* (**48**, 4, p. 584) Article based on AIAA Paper 2010-2954

A11-070 Application of System-Identification Techniquest to Health Monitoring of On-Orbit Satellite Boom Structures. Yingtao Liu, Seung Bum Kim, and Aditi Chattopadhyay, *Arizona State University*; and Derek T. Doyle, *U.S. Air Force Research Laboratory*, (**48**, 4, p. 589) Article based on AIAA Paper 2010-3027

A11-071 Dynamic Response to Global Oscillation of Propulsion Systems with Cavitating Pumps. Shusuke Hori, *Japan Aerospace Exploration Agency*, Japan; and Christopher E. Brennen, *California Institute of Technology* (**48**, 4, p. 599) Article

A11-072 Concept and Design Details of a Universal Gas–Gas Launch Escape System. Nesrin Sarigul-Klijn and Marti M. Sarigul-Klijn, *University of California, Davis*; Gary C. Hudson and Bevin McKinney, *HMX, Inc.* (**48**, 4, p. 609) Article

A11-073 Minimum-Fuel Low-Earth Orbit Aeroassisted Orbital Transfer of Small Spacecraft. Christopher L. Darby and Anil V. Rao, *University of Florida* (**48**, 4, p. 618) Article

A11-074 Hidden Genes Genetic Algorithm for Multi-Gravity-Assist Trajectories Optimization. Ahmed Gad and Ossama Abdelkhalik, *Michigan Technological University* (**48**, 4, p. 629) Article

A11-075 Optimal Longitudinal Trajectories for Reusable Space Vehicles in the Terminal Area. S. De Ridder and E. Mooij, *Delft University of Technology*, The Netherlands (**48**, 4, p. 642) Article

A11-076 Intersatellite Separation Mechanism for the JC2Sat Formation-Flying Missions. Casey Lambert and Alfred Ng, *Canadian Space Agency*, Canada; Yosuke Nakamura and Hiroshi Horiguchi, *Japan Aerospace Exploration Agency*, Japan (**48**, 4, p. 654) Article based on AIAA Paper 2010-7957

A11-077 Trajectory Prediction of Spin-Stabilized Projectiles with a Liquid Payload. G. R. Cooper, *U.S. Army Research Laboratory*; and Mark Costello, *Georgia Institute of Technology* (**48**, 4, p. 664) Article

A11-078 Improving the LEON Spacecraft Computer Processor for Real-Time Performance Analysis. David Guzman, Manuel Prieto, Sebastián Sanchez, Javier Almena, Oscar Rodriguez, and Daniel Meziat, *Universidad de Alcalá*, Spain (**48**, 4, p. 671) Article

A11-079 Matrix Methods for Optimal Manifesting of Multinode Space Exploration Systems. Paul T. Grogan, Afreen Siddiqi, and Olivier L. de Weck, *Massachusetts Institute of Technology* (**48**, 4, p. 679) Article based on AIAA Paper 2010-8805

A11-080 Attitude-Independent Magnetometer Calibration Considering Magnetic Torquer Coupling Effect. Eunghyun Kim, *Korea Aerospace Research Institute*, South Korea (ROK); Hychoong Bang, *Korea Advanced Institute of Science and Technology*, South Korea (ROK); and Seon-Ho Lee, *Korea Aerospace Research Institute*, South Korea (ROK) (**48**, 4, p. 691) Technical Note

A11-081 Optimal Distribution of Electronic Components to Balance Environmental Fluxes. Derek W. Hengeveld, *LoadPath*; James E. Braun and Eckhard A. Groll, *Purdue University*; and Andrew D. Williams, *U.S. Air Force Research Laboratory* (**48**, 4, p. 694) Technical Note

A11-082 Force Measurements in Hypervelocity Flows with an Acceleration Compensated Piezoelectric Balance. Eric C. Marineau, *CUBRC* (**48**, 4, p. 697) Technical Note

A11-083 Discharging of Roving Objects in the Lunar Polar Regions. T. L. Jackson, W. M. Farrell, and R. M. Killen, *NASA Goddard Space Flight Center*; G. T. Delory and J. S. Halekas, *University of California, Berkeley*; and T. J. Stubbs, *NASA Goddard Space Flight Center* (**48**, 4, p. 700) Technical Note

A11-084 Introduction: Mars Phoenix Lander: A 10-Year Journey to the Red Planet. Prasun N. Desai, *NASA Langley Research Center* (**48**, 5, p. 705) Article

A11-085 Overview of the Phoenix Entry, Descent, and Landing System Architecture. Myron R. Grover III and Benjamin D. Cichy, *Jet Propulsion Laboratory, California Institute of Technology*; and Prasun N. Desai, *NASA Langley Research Center* (**48**, 5, p. 706) Article based on AIAA Paper 2008-7218

A11-086 Aerodynamics for Mars Phoenix Entry Capsule. Karl T. Edquist, Prasun N. Desai, and Mark Schoenenberger, *NASA Langley Research Center* (**48**, 5, p. 713) Article based on AIAA Paper 2008-7219

A11-087 Aeroheating Predictions for Phoenix Entry Vehicle. Ryan D. McDaniel and Michael J. Wright, *NASA Ames Research Center*; and Jarvis T. Songer, *Lockheed Martin Entry Systems* (**48**, 5, p. 727) Article based on AIAA Paper 2008-1279

A11-088 Analysis of Effectiveness of Phoenix Entry Reaction Control System. Artem A. Dyakonov, Christopher E. Glass, and Prasun N. Desai, *NASA Langley Research Center*; and John W. Van Norman, *Analytical Mechanics Associates* (**48**, 5, p. 746) Article based on AIAA Paper 2008-7220

A11-089 Mars Phoenix Entry, Descent, and Landing Simulation Design and Modeling Analysis. Jill L. Prince, Prasun N. Desai, and Eric M. Queen, *NASA Langley Research Center*; and Myron R. Grover, *Jet Propulsion Laboratory, California Institute of Technology* (**48**, 5, p. 756) Article based on AIAA Paper 2008-7507

A11-090 Multibody Modeling and Simulation for Mars Phoenix Entry, Descent, and Landing. Eric M. Queen, Jill L. Prince, and Prasun N. Desai, *NASA Langley Research Center* (**48**, 5, p. 765) Article based on AIAA Paper 2008-7347

A11-091 Phoenix Landing Radar Heatshield Anomaly. J Eric Belz, Curtis Chen, and Ben Cichy, *Jet Propulsion Laboratory, California Institute of Technology* (**48**, 5, p. 772) Article

A11-092 Entry, Descent, and Landing Operations Analysis for the Mars Phoenix Lander. Jill L. Prince, Prasun N. Desai, and Eric M. Queen, *NASA Langley Research Center*; and Myron R. Grover, *Jet Propulsion Laboratory, California Institute of Technology* (**48**, 5, p. 778) Article based on AIAA Paper 2008-7349

A11-093 Landing-Site Dispersion Analysis and Statistical Assessment for the Mars Phoenix Lander. Eugene P. Bonfiglio, Douglas Adams, Lynn Craig, and David Spencer, *Jet Propulsion Laboratory, California Institute of Technology*; Raymond Arvidson and Tabatha Heet, *Washington University* (**48**, 5, p. 784) Article based on AIAA Paper 2008-7348

A11-094 Entry, Descent, and Landing Performance of the Mars Phoenix Lander. Prasun N. Desai, Jill L. Prince, Eric M. Queen, Mark M. Schoenenberger, and Juan R. Cruz, *NASA Langley Research Center*; and Myron R. Grover, *Jet Propulsion Laboratory, California Institute of Technology* (**48**, 5, p. 798) Article based on AIAA Paper 2008-7346

A11-095 Mars Phoenix Entry, Descent, and Landing Trajectory and Atmosphere Reconstruction. Robert C. Blanchard, *George Washington University*; and Prasun N. Desai, *NASA Langley Research Center* (**48**, 5, p. 809) Article

A11-096 Reconstruction of Entry, Descent, and Landing Communications for the Phoenix Mars Lander. Richard P. Kornfeld, Kristoffer N. Bruvold, David D. Morabito, Lynn E. Craig, Sami W. Asmar, and Peter A. Ilott, *Jet Propulsion Laboratory, California Institute of Technology* (**48**, 5, p. 822) Article

A11-097 Direct Coupling of the NEQAIR Radiation and DPLR Computational Fluid Dynamics Codes. Grant E. Palmer and Todd White, *ELORET Corporation*; and Alexander Pace, *Georgia University of Technology* (**48**, 5, p. 836) Article based on AIAA Paper 2010-5051

A11-098 Handling Qualities Evaluation of Pilot Tools for Spacecraft Docking in Earth Orbit. Karl Bilimoria, Eric R. Mueller, and Chad R. Frost, *NASA Ames Research Center* (**48**, 5, p. 846) Article based on AIAA Paper 2009-5665

A11-099 Costate Estimation Using Multiple-Interval Pseudospectral Methods. Christopher L. Darby, Divya Garg, and Anil V. Rao, *University of Florida* (**48**, 5, p. 856) Article

A11-100 Analysis Results of Microparticles Capturer Experiment Samples on Service Module. Riyo Yamanaka, *Japan Aerospace Exploration Agency*, Japan; Takaaki Noguchi, *Ibaraki University*, Japan; and Yugo Kimoto, *Japan Aerospace Exploration Agency*, Japan (**48**, 5, p. 867) Article

A11-101 Deployment Experiment for Ultralarge Solar Sail System (UltraSail). Byoungsam Woo, Kevin M. Ertmer, and Victoria L. Coverstone, *University of Illinois at Urbana–Champaign*; Rodney L. Burton, Gabriel F. Benavides, and David L. Carroll, *CU Aerospace* (**48**, 5, p. 874) Article

A11-102 Transient Dynamic Analysis of Gossamer-Appendage Deployment Using Nonlinear Finite Element Method. Hiraku Sakamoto, *Tokyo Institute of Technology*, Japan; Yasuyuki Miyazaki, *Nihon University*, Japan; and Osamu Mori, *Japan Aerospace Exploration Agency*, Japan (**48**, 5, p. 881) Article based on AIAA Paper 2009-2170

A11-103 Proton Irradiation Effects on ZnO Pigments Modified by ZrO_2 Nanopowders. M.M. Mikhailov and V.V. Neshchimenko, *Tomsk State University of Control Systems and Radioelectronics*, Russia; Shiyu He and Chundong Li, *Harbin Institute of Technology*, China (PRC) (**48**, 5, p. 891) Article

A11-104 Nonequilibrium Chemistry and Radiation for Neptune Entry. Chul Park, *Korea Advanced Institute of Science and Technology*, South Korea (ROK) (**48**, 6, p. 897) Article based on AIAA Paper 2010-4520

A11-105 Silicone Polymer Composites for Thermal Protection of Naval Launching System. Joseph H. Koo, *University of Texas at Austin*; Mark J. Miller, *BAE Systems*; Jon Weispfenning, *Cytec Engineered Materials*; and Charles Blackmon, *U.S. Naval Surface Warfare Center* (**48**, 6, p. 904) Article based on AIAA Paper 2009-5274

A11-106 Method to Have Multilayer Thermal Insulation Provide Damage Detection. Stanley E. Woodard, *NASA Langley Research Center*; Bryant D. Taylor, *Swales Aerospace*,; Thomas W. Jones and Qamar A. Shams, *NASA Langley Research Center*; Frankel Lyons, *ESCG/Hamilton Sundstrand*; and Donald J. Henderson, *NASA White Sands Test Facility* (**48**, 6, p. 920) Article based on AIAA Paper 2007-1847

A11-107 Low-Energy Electron Exposure of Space Materials. Martin R. Ciofalo, Mary E. Brady, Christopher J. Panetta, and Michael J. Meshishnek, *The Aerospace Corporation* (**48**, 6, p. 931) Article

A11-108 Experimental Techniques and Structural Parameter Estimation Studies of Spacecraft Cables. James C. Goodding, *CSA Engineering*; Emil V. Ardelean, *Schafer Corporation*; Vit Babuska, *Sandia National Laboratories*; Lawrence M. Robertson and Steven A. Lane, *U.S. Air Force Research Laboratory* (**48**, 6, p. 942) Article

A11-109 Dynamic Modeling and Experimental Validation of a Cable-Loaded Panel. Douglas M. Coombs and James C. Goodding, *CSA Engineering*; Vit Babuška, *Sandia National Laboratories*; Emil V. Ardelean, *Schafer Corporation*; Lawrence M. Robertson and Steven A. Lane, *U.S. Air Force Research Laboratory, Space Vehicles Directorate* (**48**, 6, p. 958) Article

A11-110 Assessing Fractionated Spacecraft Value Propositions for Earth Imaging Space Missions. M. G. O'Neill and Annalisa L. Weigel, *Massachusetts Institute of Technology* (**48**, 6, p. 974) Article

A11-111 Dynamical Model of Rocket Propellant Loading with Liquid Hydrogen. Viatcheslav V. Osipov, *MCT, Inc.*; Matthew J. Daigle, *University of California, Santa Cruz*,; Cyrill B. Muratov, *New Jersey Institute of Technology*; Michael Foygel, *SGT, Inc.*; Vadim Smelyanskiy, *NASA Ames Research Center*; and Michael D. Watson, *NASA Marshall Space Flight Center* (**48**, 6, p. 987) Article

A11-112 Test and Evaluation of Space and Airborne Imaging Sensor Platforms. Heard Lowry, Randy Nicholson, Randy Simpson, Kim Mead, Dustin Crider, and Mary Breeden, *Aerospace Testing Alliance* (**48**, 6, p. 999) Article

A11-113 Mars Entry Bank Profile Design for Terminal State Optimization. Jarret M. Lafleur and Christopher J. Cerimele, *NASA Johnson Space Center* (**48**, 6, p. 1012) Article based on AIAA Paper 2008-6213

A11-114 Sequential Design of Satellite Formations with Invariant Distances. Yu Ning, Martin E. Avendano, and Daniele Mortari, *Texas A&M University* (**48**, 6, p. 1025) Article based on AIAA Paper 10-262

A11-115 Attitude and Power Analysis of Two-Node Multitethered Coulomb Structures. Carl R. Seubert, Stephen A. Panosian, and Hanspeter Schaub, *University of Colorado* (**48**, 6, p. 1033) Article based on AIAA Paper 2010-8130

A11-116 In-Orbit Demonstration of an Optical Navigation System for Autonomous Rendezvous Docking. Masaaki Mokuno and Isao Kawano, *Japan Aerospace Exploration Agency*, Japan (**48**, 6, p. 1046) Article

A11-117 Orbit Determination and Prediction of the International Space Station. Oliver Montenbruck, *DLR, German Aerospace Center*, Germany; Sergey Rozkov and Alexander Semenov, *RSC Energia*, Russia; Suzan F. Gomez, *NASA Johnson Space Center*; Rosario Nasca and Luigi Cacciapuoti, *ESA*, The Netherlands (**48**, 6, p. 1055) Article

A11-118 Technology Readiness Levels and Space Program Schedule Change. Ed Conrow, *Management and Technology Associates* (**48**, 6, p. 1068) Technical Note
